### SLEEVES FOR LIFTING SLINGS

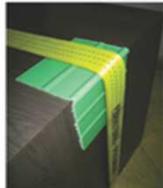

HMPE Dyneema/Kevlar Sleeves now made for lightweight and larger sleeves same as woven ones. Tested for abrasive resistance and cut resistance more than steel in minimal thickness and extremely long life. Perfect for steel industry as handling coils was never better.

Cut resistant Kevlar/HMPE Sheet Stitched with Velcro. Most efficient in low temperatures and to lift products with protruding sharp points, weld spats, this sleeve provides cushion and protection both. The sleeve allows sling to slide freely providing maximum wear resistance.

Full Velcro Anti - cut sleeve can be put on and removed from service whenever required. High molecular aramid Velcro to be stable at 300 ton load. Perfect for round sling if one leg or two leg are to be secured.

Full Velcro Anti Abrasive sleeve which can be put on and removed from service whenever required. High Molecular aramid Velcro to be stable at 300ton load.
