MULTI PURPOSE EDIBLE SPOONS

*Relish till last Bite*

OLINVON EDIBLES is the edible spoon manufacturer arm of M/s. TJKIMPEX.

Everyday human all around the globe use plastic or wooden disposable cutlery to consume ones own meal. During the pandemic the use has even increased due to hygiene and safety issues. This has lead to tremendous amount of plastic waste and an extra load on the natural resources.

The best that one may try we do tend to lick or chew the plastic or wooden spoon that we use. Children have a larger tendency to chew these harmful spoons out of lust and curiosity. This may lead to health issues in adults and more in children.

OLINVON EDIBLES has developed 3 useful designs of spoons to substitute plastic and wood with healthy natural wheat flour. OLINVON spoons as made from combination of multi grain flour and sugar to make its consumption a lovely experience with no health issues to worry about.

OLINVON SPOONS: We presently have 3 designs. 2 for use in the ice cream parlour, cake, desserts, chaat industry to name a few. And 1, for use in hotel industry for consumption of soups and foods.

***Its not necessary to have a Golden or Silver spoon for a tasty Meal, an Edible spoon offers more withones commitment to Zero waste with Good food for a Healthy long Life.***
